

PEMBROKE COLLEGE  
CAMBRIDGE

**THE RON THOMSON RESEARCH FELLOWSHIP IN ALZHEIMER'S  
DISEASE**

The College hopes to elect not later than 31 January 2018 to the following Fellowship with appointment from 1 October 2018:

**THE RON THOMSON RESEARCH FELLOWSHIP IN ALZHEIMER'S DISEASE**

The duration of the Fellowship will be for three years. The holder will be expected to do a limited amount of teaching for the College, in the form of up to six hours per week of undergraduate supervision (small group teaching) of topics relevant to their own research, during the twenty teaching weeks of the academic year, and will receive additional payment for these supervisions; but would require the permission of the Governing Body to undertake other paid work. The stipend will be in the range of £22,494 to £25,298 p.a., depending on whether the successful candidate has been awarded a Ph.D. Applications are welcomed from outstandingly able researchers who have recently completed a doctoral degree or who are about to complete their doctoral studies; they will be expected to present a detailed plan for the postdoctoral research they wish to undertake during their Fellowship.

Research Fellows are offered subsidised accommodation, in College or in College-owned flats or houses; where accommodation is not required the Ron Thomson Research Fellow will be offered a study in College. Research Fellows, like every Fellow of the College, are members of the Governing Body, and enjoy a range of benefits and privileges as well as responsibilities. These include seven free meals per week at High Table, access to a Fellows' Research Fund, and eligibility to apply for support for conferences or workshops Fellows organise in Cambridge.

Applications should be made online at <http://www.pem.cam.ac.uk/about/job-vacancies/> by 30 September 2017.
