

**PEMBROKE COLLEGE  
CAMBRIDGE**

**STOKES RESEARCH FELLOWSHIP  
IN  
MATHEMATICAL OR PHYSICAL SCIENCES**

The College hopes to elect not later than 31 January 2018 to the following Fellowship with appointment from 1 October 2018:

**STOKES RESEARCH FELLOWSHIP IN MATHEMATICAL OR PHYSICAL SCIENCES**

The duration of the Fellowship will be for three years. The holder will be expected to do a limited amount of teaching for the College, but would require the permission of the Governing Body to undertake other paid work. The stipend will be in the region of £28,452 p.a. Candidates must be doctoral graduates: some experience of postdoctoral research will normally be expected. They will be expected to present a detailed plan for the research they wish to undertake during their Fellowship.

Research Fellows are offered subsidised accommodation, in College or in College-owned flats or houses; where accommodation is not required the Stokes Research Fellow will be offered a study in College. Research Fellows, like every Fellow of the College, are members of the Governing Body, and enjoy a range of benefits and privileges as well as responsibilities. These include seven free meals per week at High Table, access to a Fellows' Research Fund, and eligibility to apply for support for conferences or workshops Fellows organise in Cambridge.

Applications should be made online at <http://www.pem.cam.ac.uk/about/job-vacancies/> by 30 September 2017.
