

# The Pembroke Cambridge Summer Programme

at the University of Cambridge

### **Timetable and Module Considerations 2024**

Once you're accepted on the programme and have secured your accommodation, you'll be able to choose your courses through the online application system.

You have to take three courses and while there are some timetabling considerations to keep in mind, you can choose one of these course combinations:

#### **Course Combinations**

- One Module 1 course, one Module 2 course and one Module 3 course
- One Module 1 course and two Module 2 courses
- Two Module 1 courses and one Module 2 course
- One Module 1 or Module 2 course and two Module 3 courses
- Three Module 3 courses

If you'd like to take the Independent Supervision, this counts as a Module 3 course.

#### How do the modules work?

Our three modules span different periods of the programme. Each course has a total of 25 teaching hours, regardless of the duration.

Module 1 | First three weeks Module 2 | Final three weeks

Module 3 | All six weeks

#### **Timetable Considerations**

We offer quite a number of courses which means some classes need to run simultaneously. Within each module, our courses are divided into colour-coded teaching blocks.

Module One	(Light) Yellow	(Light) Blue	(Light) Pink
Module Two	(Dark) Yellow	(Dark) Blue	(Dark) Pink
Module Three	Green	Orange	Maroon

When choosing your courses, you need to look at which colour teaching block the course is in as these courses run at the same time and can't be taken together. You wouldn't be able to take two Light Yellow courses in Module 1 for example.

#### Seminars

Alongside your lectures you'll also attend seminars. Each course has two seminar groups (A and B) and you're assigned a group based on your course choices to make sure there are no timetable clashes.

We assign you a seminar group when course selection closes and you'll be able to see your allocated groups on the online system.

#### **Timetable**

The timetable, which shows the times and locations of your lectures and seminars, will be available on the online system just before you arrive on the programme. It will also be in your Welcome Pack, which you will receive upon arrival.

See overleaf for module and timetabling groups.

## **Module and Timetabling Groups**

Module One			
Courses	Lecturer(s)		
Advanced Microeconomic Theory	Dr Pawel Dziewulski		
The Economics of Inequality, Discrimination, Poverty and Exploitation	Prof Nick Drydakis
